FITC Rabbit anti-Human CD10 mAb

Catalog No.: A26865 1 Publications

Basic Information

Observed MW

Calculated MW
86kDa

Category
Monoclonal Antibody

Applications
FC

Cross-Reactivity
Human

Conjugate
FITC. Ex:491nm. Em:516nm.

Background

The protein encoded by this gene is a type II transmembrane glycoprotein and a common acute lymphocytic leukemia antigen that is an important cell surface marker in the diagnosis of human acute lymphocytic leukemia (ALL). The encoded protein is present on leukemic cells of pre-B phenotype, which represent 85% of cases of ALL. This protein is not restricted to leukemic cells, however, and is found on a variety of normal tissues. The protein is a neutral endopeptidase that cleaves peptides at the amino side of hydrophobic residues and inactivates several peptide hormones including glucagon, enkephalins, substance P, neurotensin, oxytocin, and bradykinin.

Recommended Dilutions

FC	5 µl per 10^6 cells in 100 µl volume

Immunogen Information

Gene ID
4311

Swiss Prot
P08473

Immunogen
Recombinant protein (or fragment).This information is considered to be commercially sensitive.

Synonyms
NEP; SFE; CD10; CALLA; CMT2T; SCA43

Contact

www.abclonal.com

Product Information

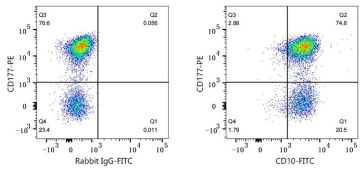

Source
Rabbit

Isotype
IgG

Purification
Affinity purification

Storage
Store at -20℃

Validation Data

Flow cytometry:1X10^6 Human peripheral blood granulocytes were surface-stained with PE Rabbit anti-Human CD177 mAb (A26896,5 μl/Test) and FITC Rabbit IgG isotype control (A25616,5 μl/Test,left) or FITC Rabbit anti-Human CD10 mAb (A26865,5 μl/Test,right).
