A6523

Leader in Biomolecular Solutions for Life Science

www.abclonal.com

AMHR2 Rabbit pAb

Catalog No.: A6523 2 Publications

Basic Information

Observed MW
58-63kDa

Calculated MW
63kDa

Category
Polyclonal Antibody

Applications
WB,ELISA

Cross-Reactivity
Human,Mouse,Rat

Background

This gene encodes the receptor for the anti-Mullerian hormone (AMH) which, in addition to testosterone, results in male sex differentiation. AMH and testosterone are produced in the testes by different cells and have different effects. Testosterone promotes the development of male genitalia while the binding of AMH to the encoded receptor prevents the development of the mullerian ducts into uterus and Fallopian tubes. Mutations in this gene are associated with persistent Mullerian duct syndrome type II. Alternatively spliced transcript variants encoding different isoforms have been identified.

Recommended Dilutions

WB	1:500 - 1:2000
ELISA	Recommended starting concentration is 1 μg/mL. Please optimize the concentration based on your specific assay requirements.

Immunogen Information

Gene ID
269

Swiss Prot
Q16671

Immunogen
Recombinant protein (or fragment).This information is considered to be commercially sensitive.

Synonyms
AMHR; MRII; MISR2; MISRII; AMHR2

Contact

www.abclonal.com

Product Information

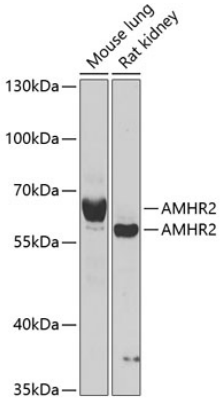

Source
Rabbit

Isotype
IgG

Purification
Affinity purification

Storage
Store at -20℃

Validation Data

Western blot analysis of various lysates using AMHR2 Rabbit pAb (A6523) at 1:1000 dilution.
Secondary antibody: HRP-conjugated Goat anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution.
Lysates/proteins: 25µg per lane.
Blocking buffer: 3% nonfat dry milk in TBST.
Detection: ECL Basic Kit (RM00020).
Exposure time: 90s.
