## **Recombinant Mouse Latent TGF-beta 1 Protein**

Catalog No.: RP01167 Recombinant 1 Publications

## Sequence Information

**Species Gene ID Swiss Prot** HEK293 cells 21803 P04202

**Tags** 

N-His

**Synonyms** 

TGF-

beta1;Tgfb;Tgfb-1;TGFbeta1;CED;DPD1 ;LAP;TGFB;TGFbeta;TGFB1

#### **Product Information**

**Purification** Source

HEK293 cells ≥ 95 % as determined by

SDS-PAGE.

#### **Endotoxin**

< 0.1 EU/µg of the protein by LAL method.

### **Formulation**

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.Contact us for customized product form or formulation.

#### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile 4 mM HCl. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## **Background**

### **Basic Information**

#### Description

Recombinant Mouse Latent TGF-beta 1 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Leu30-Ser390) of mouse TGF-beta 1 (Accession #NP\_035707.1) fused with a 8×His tag at the Nterminus.

#### **Bio-Activity**

Measured by its ability to inhibit the IL-4-dependent proliferation of HT-2 mouse T cells. The ED<sub>50</sub> for this effect is 0.02-0.1 ng/mL, corresponding to a specific activity of  $1.0 \times 10^7 - 5.0 \times 10^7$  units/mg.

#### **Storage**

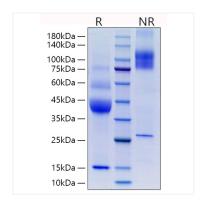

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

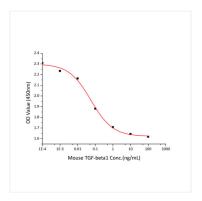

Avoid repeated freeze/thaw cycles.

<sup>\*</sup> For your safety and health, please wear a lab coat and disposable gloves when handling.

## **Validation Data**

Recombinant Mouse Latent TGF-beta 1 Protein was determined by SDS-PAGE under reducing (R) and nonreducing (NR) conditions.

Recombinant Mouse TGF-beta 1 inhibits the IL-4-dependent proliferation of HT-2 mouse T cells. The  $ED_{50}$  for this effect is 0.02-0.1 ng/mL, corresponding to a specific activity of  $1.0\times10^7$ - $5.0\times10^7$ units/mg.
