Leader in Biomolecular Solutions for Life Science

Recombinant Human CCL16/HCC-4 Protein

Catalog No.: RP01595

Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
HEK293 cells	6360	O15467

Tags

C-His

Synonyms

CCL16; IL16; IL16; NCC4; SCYA16; C-C motif chemokine 16

Product Information

Source	Purification
	≥ 95 % as determined by SDS-PAGE.

Endotoxin

< 0.01 EU/μg of the protein by LAL method.

Formulation

Lyophilized from 0.22μm filtered solution in PBS (pH 7.4).

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

CCL16/HCC-4 Shows chemotactic activity for lymphocytes and monocytes but not neutrophils. Also shows potent myelosuppressive activity, suppresses proliferation of myeloid progenitor cells. Recombinant SCYA16 shows chemotactic activity for monocytes and THP-1 monocytes, but not for resting lymphocytes and neutrophils. Induces a calcium flux in THP-1 cells that were desensitized by prior expression to RANTES.

Basic Information

Description

Recombinant Human CCL16/HCC-4 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Gln24-Gln120) of Human CCL16/HCC-4 (Accession # O15467) fused with His tag at the C-terminus.

Bio-Activity

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.
