

RP02189

Leader in Biomolecular Solutions for Life Science

Recombinant Human Galectin-7/LGALS7 Protein

Catalog No.: RP02189 **Recombinant**

Sequence Information

Species	Gene ID	Swiss Prot
<i>E. coli</i>	3963	P47929

Tags
No tag

Synonyms
GAL7;LGALS7A;LGALS7

Product Information

Source	Purification
<i>E. coli</i>	> 95% by SDS-PAGE.

Endotoxin
< 1 EU/μg of the protein by LAL method.

Formulation
Lyophilized from a 0.2 μm filtered solution of 20mM Tris-HCl, 150mM NaCl, 1mM EDTA, 5% Trehalose, pH8.0. Contact us for customized product form or formulation.

Reconstitution
Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

The Galectin family of proteins, with specificity for N-acetylglucosamine containing glycoproteins, consists of beta-galactoside binding lectins containing homologous carbohydrate recognition domains (CRDs). They also possess hemagglutination activity, which is attributable to their bivalent carbohydrate binding properties. Galectins are active both intracellularly and extracellularly. Although they are localized primarily in the cytoplasm and lack a classical signal peptide; they can be secreted by one or more as yet unidentified non-classical secretory pathways. They have diverse effects on many cellular functions including adhesion, migration, polarity, chemotaxis, proliferation, apoptosis, and differentiation. Galectins may play a key role in many pathological states, including autoimmune diseases, allergic reactions, inflammation, tumor cell metastasis, atherosclerosis, and diabetic complications.

Basic Information

Description
Recombinant Human Galectin-7/LGALS7 Protein is produced by E.coli expression system. The target protein is expressed with sequence (Met1-Phe136) of human LGALS7 (Accession #P47929).

Bio-Activity

Storage
Store the lyophilized protein at -20°C to -80 °C for long term. After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week. Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human
Galectin-7/LGALS7 Protein was
determined by SDS-PAGE with
Coomassie Blue, showing a band at
14kDa.
