# Recombinant Human BMP-4 (E399D) Protein

Catalog No.: RP02512S

Recombinant

## Sequence Information

Species	Gene ID	Swiss Prot
E.coli	652	P12644

### Tags

No tag

### Synonyms

BMP-4; BMP4; BMP2B; BMP2B1;  
MCOPS6; OFC11; ZYME

## Product Information

Source	Purification
	≥ 95 % as determined by SDS-PAGE.

### Endotoxin

< 1 EU/μg of the protein by LAL method.

### Formulation

Lyophilized from a 0.22 μm filtered solution of 0.1% TFA, 30% Acetonitrile. Contact us for customized product form or formulation.

### Reconstitution

Reconstituted with 4mM HCl to 0.25mg/mL.

## Contact

## Background

Bone morphogenetic protein 4 is a protein that in humans is encoded by BMP4 gene. BMP4 is found on chromosome 14q22-q23. BMP4 is a member of the bone morphogenetic protein family which is part of the transforming growth factor-beta superfamily. The superfamily includes large families of growth and differentiation factors. BMP4 is highly conserved evolutionarily. BMP4 is found in early embryonic development in the ventral marginal zone and in the eye, heart blood and otic vesicle.

## Basic Information

### Description

Recombinant Human BMP-4 (E399D) Protein is produced by E.coli expression system. The target protein is expressed with sequence (Ser293-Arg408 (E399D)) of human BMP-4 (Accession #P12644) fused with No tag.

### Bio-Activity

Measured by its ability to induce alkaline phosphatase production by ATDC5 mouse chondrogenic cells. The ED<sub>50</sub> for this effect is 30.3-121.2 ng/mL, corresponding to a specific activity of 8.25×10<sup>3</sup>~3.30×10<sup>4</sup> units/mg.

### Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

### Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

### Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

\* For your safety and health, please wear a lab coat and disposable gloves when handling.

## Validation Data

Recombinant Human BMP-4 (E399D) Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.

Measured by its ability to induce alkaline phosphatase production by ATDC5 mouse chondrogenic cells. The  $ED_{50}$  for this effect is 30.3-121.2 ng/mL, corresponding to a specific activity of  $8.25 \times 10^3 \sim 3.30 \times 10^4$  units/mg.
