Leader in Biomolecular Solutions for Life Science

Recombinant Human PPAR-alpha//NR1C1 Protein

Catalog No.: RP02969LQ

Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
<I>E. coli</I>	5465	Q07869

Tags

N-His

Synonyms

GLM1; CIMT1; NR1C3; PPARG1; PPARG2; PPARG5; PPARGgamma

Product Information

Source

<I>E. coli</I>

Purification

> 95% by SDS-PAGE.

Endotoxin

<1EU/μg

Formulation

Supplied as a 0.22 μm filtered solution in PBS, 10% Glycerol, 0.5% SKL, pH 8.0.

Reconstitution

Background

Peroxisome proliferators include hypolipidemic drugs, herbicides, leukotriene antagonists, and plasticizers; this term arises because they induce an increase in the size and number of peroxisomes. Peroxisomes are subcellular organelles found in plants and animals that contain enzymes for respiration and for cholesterol and lipid metabolism. The action of peroxisome proliferators is thought to be mediated via specific receptors, called PPARs, which belong to the steroid hormone receptor superfamily. PPARs affect the expression of target genes involved in cell proliferation, cell differentiation and in immune and inflammation responses. Three closely related subtypes (alpha, beta/delta, and gamma) have been identified. This gene encodes the subtype PPAR-alpha, which is a nuclear transcription factor. Multiple alternatively spliced transcript variants have been described for this gene, although the full-length nature of only two has been determined.

Basic Information

Description

Recombinant Human PPAR-alpha Protein is produced by <I>E. coli</I> expression system. The target protein is expressed with sequence (Thr200-Tyr468) of human PPAR-alpha (Accession #NP_001001928.1) fused with a 6×His tag at the N-terminus.

Bio-Activity

Storage

Store at -70°C. This product is stable at ≤ -70°C for up to 1 year from the date of receipt. For optimal storage, aliquot into smaller quantities after centrifugation and store at recommended temperature. Avoid repeated freeze-thaw cycles. Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human PPAR-alpha Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 32 kDa.
