

RP03274

Leader in Biomolecular Solutions for Life Science

# Recombinant Human Sortilin/SORT1 Protein

Catalog No.: RP03274 **Recombinant**

## Sequence Information

Species	Gene ID	Swiss Prot
HEK293 cells	6272	Q99523-1

### Tags

C-His

### Synonyms

SORT1; Sortilin; 100 kDa NT receptor; Glycoprotein 95; Gp95; Neurotensin receptor 3; NT3; NTR3

## Product Information

Source	Purification
	≥ 95 % as determined by SDS-PAGE.

### Endotoxin

< 0.01 EU/μg of the protein by LAL method

### Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

The Sortilin is a sorting receptor in the Golgi compartment and as a clearance receptor on the cell surface. Required for protein transport from the Golgi apparatus to the lysosomes by a pathway that is independent of the mannose-6-phosphate receptor (M6PR). Lysosomal proteins bind specifically to the receptor in the Golgi apparatus and the resulting receptor-ligand complex is transported to an acidic prelysosomal compartment where the low pH mediates the dissociation of the complex. The receptor is then recycled back to the Golgi for another round of trafficking through its binding to the retromer.

## Basic Information

### Description

Recombinant Human Sortilin/SORT1 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Ser78 - Asn755) of Human Sortilin/SORT1 Protein (Accession #NP\_002950.3) fused with His tag at the C-terminus.

### Bio-Activity

### Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

\* For your safety and health, please wear a lab coat and disposable gloves when handling.

## Validation Data

---

Recombinant Human Sortilin/SORT1  
Protein was determined by SDS-  
PAGE under reducing conditions with  
Coomassie Blue.
