

RP03420LQ

Leader in Biomolecular Solutions for Life Science

Recombinant Human PTK6/BRK Kinase

Catalog No.: RP03420LQ **Recombinant**

Sequence Information

Species	Gene ID	Swiss Prot
Baculovirus- Insect Cells	5753	Q13882

Tags

N-GST

Synonyms

PTK6; BRK; Protein-tyrosine kinase 6;
Breast tumor kinase; Tyrosine-protein
kinase BRK

Product Information

Source	Purification
	≥ 90 % as determined by SDS-PAGE; ≥ 90 % as determined by HPLC.

Endotoxin

< 1 EU/μg of the protein by LAL
method.

Formulation

Supplied as a 0.22 μm filtered solution
in 20 mM Tris-HCl, 150 mM NaCl, 5%
glycerol, 5 mM DTT, 0.1M Trehalose.
(pH 7.5). Contact us for customized
product form or formulation.

Reconstitution

Please use running water to thaw it
quickly.

Background

Tyrosine-protein kinase 6 is an enzyme that in humans is encoded by the PTK6 gene. Tyrosine-protein kinase 6—also known as BRK (breast tumor kinase)—is a cytoplasmic non-receptor protein kinase which may function as an intracellular signal transducer in epithelial tissues. The encoded protein has been shown to undergo autophosphorylation. Overexpression of this gene in mammary epithelial cells leads to sensitization of the cells to epidermal growth factor and results in a partially transformed phenotype. Expression of this gene has been detected at low levels in some breast tumors but not in normal breast tissue.

Basic Information

Description

Recombinant Human PTK6/BRK Kinase is produced by Baculovirus-Insect Cells expression system. The target protein is expressed with sequence (Val2-Thr451) of Human PTK6 (Accession #Q13882) fused with a N-GST tag.

Bio-Activity

The activity of PTK6 is based on the MSA technology, and the content and ratio of the substrate and the product are directly separated and detected in real time and dynamically by the different migration rates of the substrate and the product after the enzymatic reaction.

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Storage

Store at -70°C. This product is stable at ≤ -70°C for up to 1 year from the date of receipt. For optimal storage, aliquot into smaller quantities after centrifugation and store at recommended temperature.

Aliquots below 10 μL are not advisable. Product must not be stored in diluted solutions. Avoid repeated freeze-thaw cycles.

Avoid repeated freeze/thaw cycles.

* For your safety and health, please wear a lab coat and disposable gloves when handling.

Validation Data

Recombinant Human PTK6/BRK Kinase was resolved with SDS-PAGE under reducing (Lane 1) and non-reducing (Lane 2) conditions.

The activity of PTK6 is based on the MSA technology, and the content and ratio of the substrate and the product are directly separated and detected in real time and dynamically by the different migration rates of the substrate and the product after the enzymatic reaction.
